SCIENCE

Complimenting & Supplementing Learning & Education

Data Collection : Information Processing : Intelligence Analysis : Presentation Generation

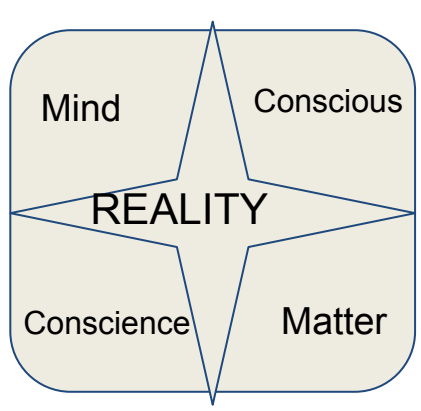
SCIENCE OVERVIEW Education and Learning are crucial and important requirement to enhance self estem, confidence, awareness and metal clarity

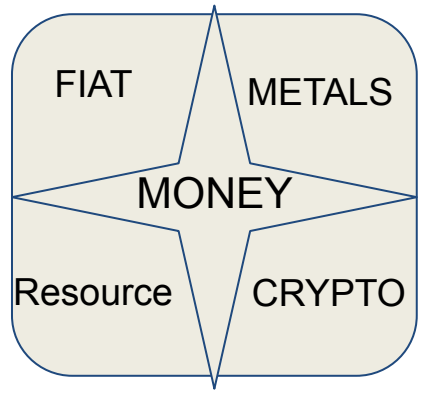
In the olden days, learning and education was acquired through apprenticeship and experience

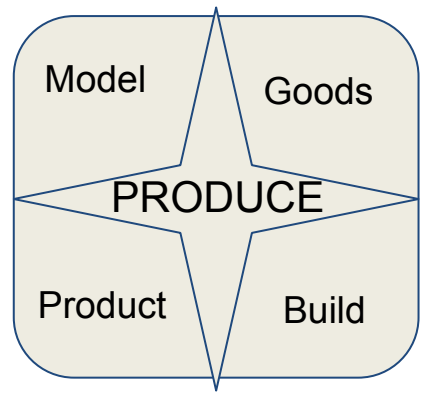
This while enhance one productivity on a specific issue, it tends to limit modelling abilities while adequately promoting building skills

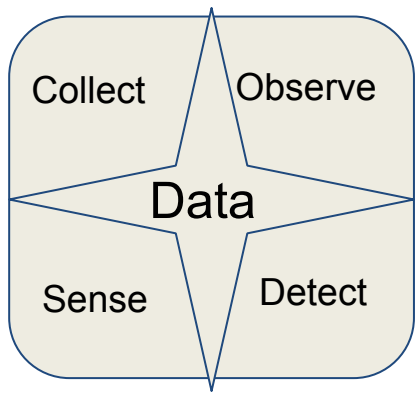
In the advent of templates and artificial intellinnce beyond learning only from a teacher and library, one is now able to reach their maximum potential as long they are ready to put time, commitment, effort and ask the right questions

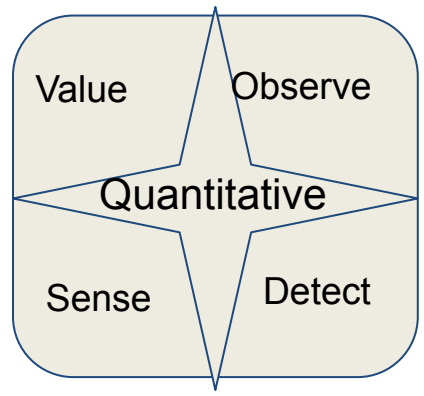
AI is providing agent level response to you as an entrepreneur and the four shade of thought helps in identifying relevant questions

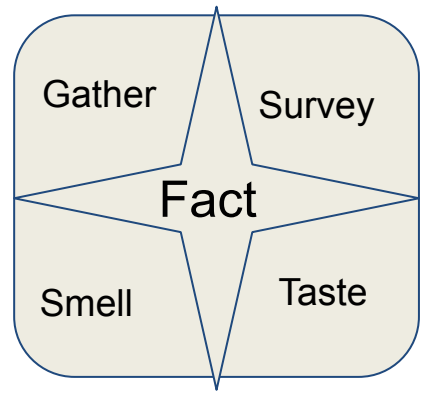


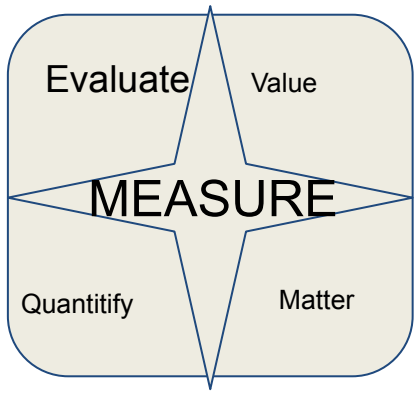


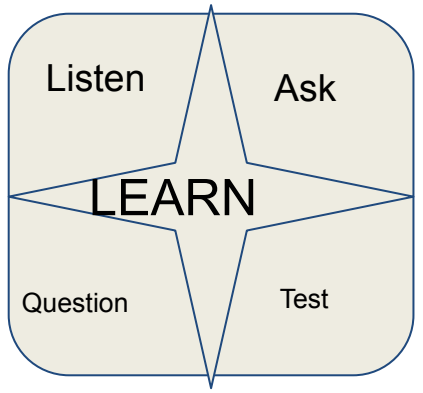


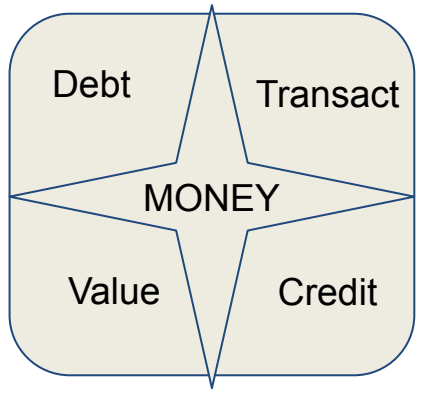


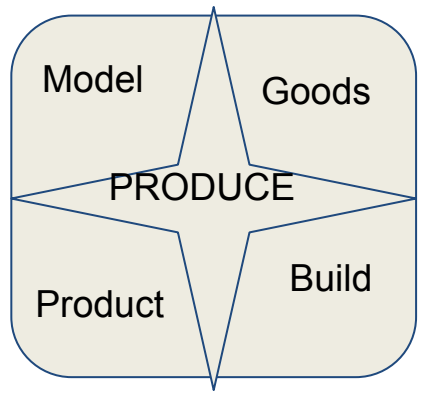


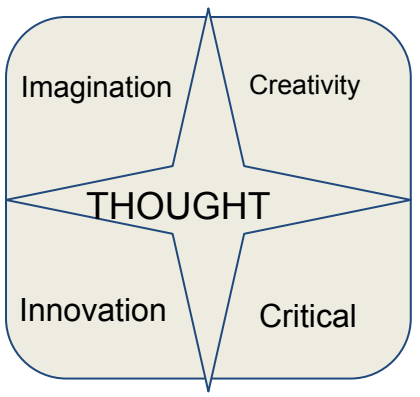


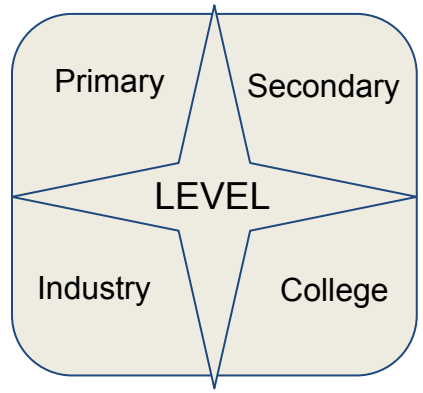












THEORY
